WHY WE ARE DIFFERENT

Your venue cannot close for a carpet clean.

Traditional hot water extraction leaves carpet and seating wet for six hours or more. For a home that is an inconvenience. For a dining room, a lobby or a common room it is lost trading time — so most venues simply put the job off until the furniture looks bad.

1–2 hours

Back in service after a maintenance clean, not the next day.

6+ hours

What conventional hot water extraction typically needs.

0 franchise fees

Owner-operated. You deal with Adam, start to finish.

HOW WE GET AROUND IT

Low-moisture encapsulation. The cleaning agent crystallises around each soil particle instead of flooding the fibre with water. The crystals are then vacuumed away — so the carpet or seating takes on a fraction of the moisture and is dry, groomed and back in use within one to two hours.

That is what makes a scheduled maintenance program realistic for a working venue. We clean around your trading hours, and nothing is roped off the next morning.

For a deeper restorative reset we still recommend hot water extraction once or twice a year, booked separately at a quiet point in your calendar.

WHO WE WORK WITH

- **Hotels & motels**
Lobby lounges, room chairs, corridor furniture — scheduled around guest turnover.
- **Cafés, restaurants & bars**
Banquettes, booths, dining chairs and bar stools, cleaned outside service hours.
- **Aged care facilities**
Common-room and resident lounge seating. Police Check and screening compliant.
- **Short-stay & Airbnb**
Periodic deep clean layered under your regular turnover cleaner, not replacing it.

“I quote the job, I do the job, and I’m the one you call if something isn’t right.”

Adam Farrelly, owner — Lefties Carpet Cleaning

SCOPE

What we clean, and how.

Everything below is available as a one-off, or folded into a scheduled maintenance program across your whole site.

Carpet cleaning

Pre-inspection and commercial vacuum, targeted pre-treatment, encapsulation or hot water extraction depending on the job, then grooming for a uniform finish.

Upholstery & lounges

Fabric identification and dye-stability testing, gentle pre-treatment, controlled rinse and shear-dry extraction. Built for high-turnover seating.

Stain & odour

Stain identification and classification, spot-specific treatment, and honest advice on what will and will not lift. Odour neutralised, not masked.

Rugs & mattresses

Specialty rug care across materials, plus hygienic mattress sanitation — dust mite and allergen removal for accommodation rooms.

THE PROCESS ON FABRIC

01

Fabric forensics

Fibre reaction and dye stability are tested before any moisture is introduced. This is the step that prevents shrinkage, browning and colour bleed.

02

Encapsulated pre-spray

Specialised chemistry lifts body oils, grime and food soil to the surface so extraction has something to take away.

03

Shear-dry extraction

High-power suction removes soil with minimal moisture, then the pile is groomed and reset so it feels right, not just looks better.

WoolSafe-approved chemistry throughout.

Non-toxic and residue-free once dry — safe around guests, residents, staff and pets.

Two ways to put us on.

Most venues end up using both — a standing schedule for the seating that gets used every day, and a number to ring when something goes wrong in front of a guest.

01

Scheduled maintenance

Recurring monthly or quarterly visits across all your upholstered seating and carpet, quoted as one flat facility rate.

- Discounted below ad-hoc pricing for locking in the schedule
- Written scope so everyone knows what is included
- Worked around your trading hours, including evenings and weekends
- 30-day account terms on ongoing agreements

02

Same-day call-ups

A spill, a stain or a VIP checkout. Priority response with a fixed rush fee.

- A fixed fee — no surprise multiplier, no guessing what it will cost
- Encapsulation means the area is back in service within the hour or two
- 7-day account terms on one-off and infrequent work
- Ring the owner directly, not a call centre

CREDENTIALS & COMPLIANCE

Public liability insurance

Comprehensive cover. Certificate of currency supplied on request, before we start.

Blue Card accredited

Queensland working-with-children accreditation, current and verifiable.

Documented service agreements

A written scope before work starts. Variations approved by you before we proceed.

National Police Check

Current. The credential aged care providers actually require of contractors.

WoolSafe-approved products

Certified safe for wool and delicate fibres — and for the people around them.

After-hours operation

Evenings and weekends, so your business loses no trading time to the clean.

Quotes are free, and a photo of the fabric or the stain gets you the fastest answer.

THE OFFER

Two ways to start, and you pick.

Both are open to any commercial premises across Hervey Bay and the Fraser Coast. Take whichever fits your situation — you cannot take both.

OPTION ONE

20%

off your first invoice

Whatever the scope — one lounge suite or a whole-site clean — twenty per cent comes off the total of your first invoice.

BEST IF

You have no cleaner on contract, or you have been doing it in-house and want to see the difference before committing to a schedule.

OPTION TWO

15%

less than you pay now

Show us what your current cleaner charges. We do comparable work for fifteen per cent less, held for twelve months.

BEST IF

You already have an operator and you are reasonably happy — but the invoice has crept up, or the drying time is costing you trading hours.

HOW TO TAKE IT UP

1. Ring or email

Mention this pack. That is the whole qualification process.

2. Free walkthrough

We look at the actual seating and carpet and quote against it.

3. Written scope

The discount is applied on the quote, in writing, before you accept.

THE FINE PRINT — ALL OF IT

One offer per business; the two cannot be combined, and neither combines with other promotions. Option Two requires a current dated invoice or written quote from your existing provider for comparable scope and frequency, and the 15% is measured against that document; the rate holds for twelve months from your first clean. Both offers are open to commercial premises within Hervey Bay and the Fraser Coast, on work booked before 31 December 2026. Standard commercial terms and our written service agreement apply.

NEXT STEPS

It starts with a walkthrough.

Fifteen minutes on site is enough to quote properly. No obligation, no pressure, and you get the number of the person who will actually be doing the work.

01 A quick look around

We walk the floor with you — the seating that gets hammered, the carpet in the highest-traffic run, anything that has been bothering you.

02 An honest assessment

If a stain is permanently dyed into the fibre you will hear that on the walkthrough, not after you have paid. Some things cannot be fixed and we will say so.

03 A written quote with the discount applied

A flat facility rate if you want a schedule, or a job price if you want a one-off. Either way it is in writing before you commit to anything.

04 We book around your trading hours

Evenings, weekends, between service — whatever loses you the least. Encapsulation means it is back in use within the hour or two.
